<https://www.linkedin.com/in/daniel-e-sunday>
<https://www.danielsunday.name.ng>

Software Engineer with a background in Economics and hands-on experience building backend systems, web applications, APIs, and automation tools. Experienced with Go, Python, JavaScript, React, Next.js, Supabase, SQL, Git, and Linux. Builds practical software solutions with a focus on reliable backend logic, scalable web applications, API integration, and automation.

EXPERIENCE

Feb 2026 – Present
Software Development Fellow
Learn2Earn NG · Abuja, Nigeria

- Develop software projects through Learn2Earn NG's hands-on, project-based software engineering program. Build applications using Go, Python, JavaScript, and modern web technologies while developing skills in backend development, APIs, databases, Git, Linux, debugging, and problem-solving. Work on practical projects in a collaborative environment, applying software engineering concepts to real development challenges.

EDUCATION

2019 – 2023
Bachelor of Science (B.Sc.) in Economics
Bingham University, Nigeria

PROJECTS

Personal Developer Portfolio
<https://www.danielsunday.name.ng>

- A responsive personal portfolio website designed to showcase software engineering projects, technical skills, services, and professional experience. Implemented responsive layouts, light and dark themes, interactive UI elements, accessibility considerations, and client-side JavaScript functionality.

AI Forex Trading Bot

- A Python-based automated forex trading system connected to MetaTrader 5. Implemented market indicators, trading signals, strategy testing, backtesting, and automated trade logic. The project explores the use of AI and external data sources to improve trade decision-making.

ASCII Art Web
<https://ascii-art-web-generator.vercel.app>

- A web application that converts text into ASCII art using multiple rendering styles. Built the backend in Go and implemented file handling, text processing, input validation, HTTP routing, and dynamic rendering through a web interface.

Personal Finance Tracker
<https://github.com/dsunday05034-crypto/Personal-Finance-Tracker.git>

- A web application for managing personal finances and tracking expenses. Built with Next.js and React, with Supabase handling authentication and database operations. Implemented user authentication, and transaction management.
