<https://www.danielsunday.name.ng>

Economics graduate and software developer with experience solving technical problems, evaluating information, debugging applications, and working with AI-assisted development workflows. Strong in critical thinking, analytical reasoning, attention to detail, written communication, and following structured requirements. Experienced with Python, Go, JavaScript, APIs, databases, and AI-related applications, with the ability to work independently and communicate findings clearly in remote environments.

EXPERIENCE

Feb 2026 – Present
Software Development Fellow
Learn2Earn NG · Abuja, Nigeria

- Develop software solutions using structured problem-solving and debugging techniques.
- Analyze requirements, identify errors, and break complex problems into manageable steps.
- Work with Go, Python, web technologies, APIs, databases, and development tools.
- Review technical solutions for correctness, edge cases, and alignment with requirements.
- Use AI tools to research, analyze, and improve solutions while independently verifying generated outputs.
- Collaborate remotely and communicate technical findings clearly.

EDUCATION

2019 – 2023
Bachelor of Science (B.Sc.) in Economics
Bingham University, Nigeria

PROJECTS

AI Forex Trading Bot

- Built a Python-based trading application integrating with MetaTrader 5.
- Implemented technical indicators and trading signals to analyze market conditions.
- Developed functionality for paper trading and backtesting strategies.
- Worked with structured market data and evaluated strategy performance.

ASCII Art Web

<https://ascii-art-web-generator.vercel.app>

- Built a web application that converts text into ASCII-art representations.
- Implemented HTTP routing, text processing, validation, file handling, and user input processing.
- Debugged application behavior and improved reliability through testing and iteration.

Portfolio Website

<https://www.danielsunday.name.ng>

- Designed, developed, and deployed a personal portfolio website to showcase software development projects, technical skills, and professional experience. Implemented responsive design, navigation, theme support, and deployment through Vercel.

SKILLS

Critical Thinking	Analytical Reasoning	Problem Solving	Attention to Detail	Information Evaluation	Requirements Analysis	Written Communication						
Technical Problem Solving	AI Evaluation	AI Applications	Quality Assurance	Remote Collaboration	Python	Go	JavaScript	React				
Next.js	HTML	CSS	SQL	PostgreSQL	Supabase	REST APIs	API Integration	Git	GitHub	Linux	Docker	Automation
